PROFESSIONAL SUMMARY

AI-native DevOps Engineer with over 3+ years of expertise in automating and managing cloud-native infrastructure on **GCP and AWS**. Proficient in **Kubernetes, Docker, Terraform, and CI/CD**, with hands-on expertise in building secure, scalable, and highly available platforms. Experienced in leveraging **Claude Code and Cursor agentic coding + MCP** to accelerate infrastructure automation, code generation, debugging, testing, and developer enablement. Experienced in production support, observability setup with **Prometheus and Grafana**, and troubleshooting distributed microservices, combining strong DevOps expertise with modern **AI-native engineering practices**.

EDUCATION

Bachelor of Technology (Computer Science), JNTUK University 2019 - 2023
Aditya College Of Engineering And Technology

SKILLS

AI/Developer Tools	Claude Code, Cursor, MCP, AI-Assisted Debugging, Code Generation
Cloud Platforms	GCP (Google Cloud), AWS, Azure
Languages	Python, JavaScript(Node.js), Shell Scripting
Containerization & IAC	Docker ,Kubernetes (K8s), Helm, Terraform
CI/CD & Version Control	Git, GitHub Actions, Azure DevOps
Monitoring & Observability	Prometheus, Grafana, Google Cloud Logging
Databases & Message Queue	MySQL, MongoDB, Redis, Kafka

EXPERIENCE

DevOps Engineer Jan 2024 - Aug 2026
Jio Platforms Limited *Bangalore, Karnataka*

- Leveraged **Claude Code and Cursor** for **AI-assisted software development**, including code generation, debugging, refactoring, test generation, code review, and technical documentation.
- Applied **agentic coding and context engineering** with **Claude Code, Cursor, and MCP** to accelerate **Kubernetes troubleshooting, Terraform development, CI/CD automation, scripting, and developer workflows**.
- Developed **Python/FastAPI automation frameworks** workflows for **deployment validation, regression tests, health checks, and operational automation**, reducing manual validation effort by approximately **60%**.
- Managed production and replica environments for **5+ cloud-native e-commerce platforms** (Tira, SHEIN, Clovia, Zivame, and Metro) on **GCP and AWS**, executing **200+ production deployments**, validations, and operations.
- Supported **infrastructure augmentation and capacity expansion** for the **SHEIN platform**, enabling scale from approximately **70K to 120K+ daily orders** while maintaining **application stability, performance, and production readiness**.
- Created and maintained **reusable Helm charts** for **Kubernetes (GKE and self-managed Kubernetes)** deployments, standardizing application releases and deployment processes across multiple environments.
- Provisioned and managed **GCP infrastructure using Terraform**, including **cloud project setup, organization policies, IAM roles, and access configurations**, improving infrastructure consistency and reducing manual provisioning effort.
- Implemented **observability, monitoring, and alerting** using **Prometheus and Grafana**, developing dashboards and alerts for application and infrastructure health, performance metrics, and production incidents.

SDE Intern June 2023 - December 2023
Lovas IT Solutions Limited *Hyderabad, Telangana*

- Designed and developed **frontend web pages** based on **Figma designs** and built **backend microservices** using **Node.js and Express.js** for internal tools, with a focus on **performance, scalability, and maintainability**.
- Integrated **MongoDB** and actively involved in schema definition.
- Used **Git** for **version control** and contributed to code reviews to maintain code quality and consistency.
